

## Epsom & Ewell High School, Surrey April 2010 Ofsted Report Announces School No Longer in Special Measures

A programme of work has been co-ordinated by Alex Russell, the head appointed in June 2009 to transform the failing school. Klick Technology were able to offer the advantage of a one-stop shop service to overhaul the school which appealed to Alex as the project was of a considerable scale.

All ICT facilities were renewed including the provision of a learning centre. The changing rooms and toilet blocks also needed a complete overhaul. The project included refurbishment of a Science Lab, Food Technology Room, English & Maths blocks and a full refurbishment and equipping of the library.

As part of a further phase of improvements Klick Technology were asked to review the provision of internal and external recreational seating - something that had been specifically criticised in the previous Ofsted report. The school now has a number of areas where the children can sit and enjoy their improved surroundings with pride.

We were delighted that the inspectors commented on the use of the seating around the school. There is still further work to be completed by Klick this summer but we are pleased that the school has been rewarded for its efforts so far.

*"The school has undergone a substantial renovation and the success of this has had a lot to do with the contribution made by your workforce. The standard of work has been excellent and the men involved in carrying out this work have made every effort to fit in with the workings of the school. It would be a pleasure to recommend your company without reservation."*
