

Case Study - Epsom & Ewell High School, Surrey Failing School - Needs Action - Fast!

New head Alex Russell was appointed in June 2009. The school had been put in 'special measures' and his challenge was to transform the fabric of a failing school by September 2009. He needed a reliable company he could trust to complete the work in time. Alex had worked with Klick Technology in his previous role at The Beaconsfield School and knew they had the right attitude to complete the mission!

The school needed a complete transformation to equip it for the challenging task ahead. All ICT facilities were outdated and needed a major overhaul to bring them in line with today's ever changing technology. The changing rooms and toilets blocks also needed a complete overhaul. The project included refurbishment of a Science Lab, Food Technology Room, English & Maths blocks and a full refurbishment and equipping of the library.

Our ability to offer a one-stop shop service for these vital areas of work went some way to ensuring we won this project. But it was our attention to detail, excellent project management, cost management, friendly approach and determination to deliver a very high standard on time and to budget that ultimately won the day.

"The school has undergone a substantial renovation and the success of this has had a lot to do with the contribution made by your workforce. The standard of work has been excellent and the men involved in carrying out this work have made every effort to fit in with the workings of the school. It would be a pleasure to recommend your company without reservation."

**Alex Russell - Headteacher,
Epsom & Ewell High School, Surrey**
