

Multi storey modular buildings can be provided when space is at a premium

Perimeter benching fitted with sinks, taps and gas taps

Fully operational science lab fitted into a modular building.

Services run from perimeter for teacher's demonstration bench with docking station

Need rooms in a hurry?

In conjunction with our modular buildings partner, Klick Technology can provide fully functioning practical rooms at very short notice.

Changes to curriculum could necessitate prompt provision of extra buildings. Emergency provision may be required due to a fire or it may be that temporary accommodation is required during refurbishment work of existing buildings.

Modern modular buildings are built to withstand the demands of an educational environment. The interiors can be fitted out with **science labs, food technology rooms, ICT suites** and many other applications. Buildings are suitable for long or short term use.

It is possible to design the room layout to allow the furniture to be reused elsewhere so, if it is a short term solution, the furniture can be uplifted and refitted into your new building.

Klick Technology can provide a turnkey solution including all groundworks and associated mechanical and electrical services.

Case Studies

Cardinal Wiseman - Science Labs destroyed by fire

Klick Technology had previously worked at the school having supplied furniture for their science department. Following the disruption of the fire we were asked to fit out 2 Science Labs and a prep room into modular buildings and provide final connections. The rooms were available for use within 3 weeks of the order being placed. We have received the order to refit the furniture for the rebuilt science department later this year.

Campsmount School - Whole school destroyed by fire

Klick Technology fitted 7 science labs & 3 prep rooms into modular buildings. The installation included mechanical first & final fix and took 4 weeks to complete.

Stoke 6th Form College - Miller Construction

Modular buildings to be used during refurbishment work.

Order received to supply 4 science labs & 2 prep rooms.
