

testimonial

'We are very pleased with our new stainless steel GCSE catering facility. Klick Technology were resourceful in finding solutions to the various design and site issues that arose. Their service was extremely good and I am looking forward to working with them on a second room to be installed next year.'

Jill Thomas - Head of Food Technology, Darrick Wood Senior School, Orpington, Kent

Darrick Wood Senior School, Orpington, Kent

Refurbishment of Food Room to provide commercial catering facilities

Value: £80k

Duration of works: 8 weeks

Project Details:-

- > Disconnect existing services and make safe
- > Strip out all existing furniture
- > Remove old radiators and replace with panel radiators above worktop height
- > Installation of all new plumbing and electrical services
- > Provide interactive services
- > Installed new lighting (CAT 2)
- > Installed mushroom extraction fans within existing roof lights
- > Flooring and decoration renewed
- > Installed hygienic cladding
- > New stainless steel furniture fitted
- > Final connection of gas, water, and electrics
- > Commissioning and certification of all works

The brief was to completely refurbish Room DT5, providing a stainless steel catering facility to upgrade the school's food technology facilities. We were contracted directly by the school and liaised closely with their site management team.

It was necessary to design the room to incorporate specific cookers in order to make use of an existing extract system. An upgrade of the school mains supply board was needed to incorporate 3 phase supplies necessary for the catering equipment required. All services were hidden behind panelling and hygienic cladding was installed.

Klick Technology supplied and installed the appliances and both the commercial & domestic ovens required for the room.

The project was started during termtime and completed on time and within budget during the summer holidays.
