

testimonial

"The installation of furniture for all 58 rooms ran very smoothly and Klick were proactive in dealing with any issues on site. They were obliging when I needed some extra furniture and modifications to be made after the school was opened. The project was completed on time and we are all delighted with the end result."

Elizabeth Jordan - Head Teacher, Mary Elliot School, Walsall, Birmingham

Work in progress

Mary Elliot School, Walsall, Birmingham

- > New furniture installed
- > Builders clean

After

This project was a new build for a Special Needs School relocating from a few miles away. The school wanted to create a welcoming and warm environment for children with a wide variety of special needs.

The original room layouts were refined to suit the requirements of the school and the furniture included the provision of a variety of adjustable height units adapted for specialised purposes.

After

The furniture was colour coordinated according to the keystage of each area to assist in the identification of learning levels.

Klick worked closely with Willmott Dixon throughout the project so that when minor specification changes occurred on site these were accommodated without any impact on the schedule.
