

## testimonial

"The work was completed two weeks ahead of schedule and on budget. The college is impressed by the quality of work and level of service provided by Klick. All staff were helpful and courteous. We just left them to it and the transformation is remarkable!"

Simon Parkinson - Head of Finance & Operations, St Ambrose College, Hale Barns, Cheshire

Refurbishment of 1960's science lab

**Value:** £48k

**Duration of works:** 4 weeks

### Project Details:-

- > Stripout of old lab
- > Problem window blocked to make space for interactive whiteboard
- > Unwanted doorway blocked
- > Existing fitted fume cupboard removed
- > New furniture and mobile fume cupboard fitted
- > New radiators fitted
- > All plumbing and electrical work
- > Ceilings, flooring, lighting and decoration renewed

The brief was to completely redesign and refurbish a 40 year old worn out lab and to provide improved facilities to meet the demands of today's curriculum. Working closely with the teaching staff and school management, initial proposals on design were submitted within one week of the enquiry being made. The Manchester Wing layout was chosen with Trespa worksurfaces and the teaching focus was changed to maximise space. Further consultation with the teaching staff led to minor variation of provision and the final design was agreed.

Close liaison with the college was maintained throughout the installation. The project took place during term-time but disruption was kept to a minimum. The completely refurbished lab was handed back to the college four weeks after the commencement of works and only 12 weeks after the initial enquiry.

The project was completed in January 2007, two weeks ahead of schedule.
