

Two models are available. Both models are available in 3 widths – 850mm, 1000mm and 1200mm.

There are two basic heights on standard castors. Primary, 560mm and secondary, 660mm. Using the optional 75mm rubber-tyred wheels adds 50mm to these heights.

All worktops are 650mm deep. Twin-wheel castors are supplied as standard. These units are delivered flat packed for easy assembly.

A BAGLAN

A single tier workstation with a full size worktop protected on three sides. The photograph shows standard castors and optional Lower Storage Shelf and Tower Unit Cradle.
