

testimonial

“It was quite some achievement to co-ordinate the installation of furniture into 68 different areas within the school. However, Klick managed it and we are all very pleased with the end result. The children are thrilled to have a proper school at last!”

Vicky Vernon - Head Teacher, Torc Campus, Tamworth, Staffordshire.

Torc Campus, Tamworth, Staffordshire

Installation of furniture for special needs school in 68 areas including Science, Food Technology, Art, Design, Music, Medical, Laundry rooms and General Classrooms

Value: £100k

Client: Willmott Dixon

Duration of works: 8 weeks

Project Details:-

- > Pre-installation survey
- > Manufacture of furniture
- > Delivery and distribution of furniture on site
- > New furniture installed
- > Builders clean

The brief was to co-ordinate the supply and installation of the furniture for the school. This involved close co-operation with Willmott Dixon, the main contractor handling the redevelopment of the site. We liaised closely with the procurement team to finalise the furniture requirement for each of the 68 rooms and then provided drawings for all relevant areas.

Room layouts were fine tuned to accommodate children with special needs, including the provision of adjustable height furniture.

The furniture was manufactured, delivered and distributed to the different rooms prior to installation by our fitters. The number of rooms involved made this a complex project to organise and required significant logistical input. This ensured the project was handed over on time and within budget.
