

testimonial

"With extensive support from Klick, we were successful with our ACMF bid to refurbish our 1970's Science Department. Klick were extremely helpful from start to finish and by phasing the works, we had all 6 labs and 4 prep rooms completed for the start of the September term. This involved completing 3 labs and 3 prep rooms during the 2nd half of the summer term. I was very pleased with the way they managed to get on with the works with minimal disruption to the school and the school staff are really pleased with the finished labs."

Andy Day – Site Manager, St Edmund's Girls' School, Salisbury, Wiltshire

Service bollards & tables

Specimen display shelves

Trespa bench/eyewash

Fixed fume cupboard

Science block refurbishment for St Edmund's Girls' School, Salisbury

Refurbishment of 6 labs, 4 preps, staff room and corridor

- > Supply and installation of furniture
- > Decoration, ceiling, lighting and flooring renewed
- > Gas safety proving systems installed with Co2 monitors
- > Final connections, commissioning and certification of all works

Klick were instrumental in developing a scheme together with design layouts and a quotation package to support the schools funding application.

Once the academy received confirmation of ACMF funding the planning started for the extensive refurbishment project. Phase 1 commenced during May half term and continued throughout the summer term. Phase 2 was completed during the summer holidays. The disruption to the school was minimal and our working relationship was very positive with the school and The Salisbury Diocese who co-ordinated the project.
